## COURSE DESCRIPTION

**Course name:** Low Level Access Course

**Course Description:** A 3hr session covering the use of equipment associated with low access to cupboards, shelving etc and other low level structures.

**Recommended attendance:** The staff employed as maintenance workers, or cleaners who are required.

**Aim:** To train workers in the safety procedures and correct use of the equipment provided for access to low level structures including step ladders and stools.

**Learning objectives:** Having completed the course the delegates will be able to:

- Identify the legislation and good working practices associated with working at low levels.
- State the safety procedures which must be followed when working at low level.
- Demonstrate a high standard of practical use of the equipment required for low level access.

**Subjects Covered:**

- Legislation
- Health & Safety Executive guidance
- Description of the equipment used.
- Safety procedures
- Practical use of the equipment.

**Method:** The learning objectives will be achieved by theoretical and practical input supported by OHP transparencies, slides, delegates' notes and operational equipment.

**Assessment:** A test will be set to ensure a level of competence has been achieved and a certificate awarded to those delegates who reach a satisfactory standard.
